# Spider Vocabulary

## Arachnids

The class of animals that spiders belong to; arachnids are animals that have an exoskeleton, a two-part segmented body, and eight jointed legs. Arachnids are cold-blooded and do not have a backbone.

## Arachnophobia

Fear of spiders.

## Abdomen

A section of the spider's body that contains the guts, heart, silk glands, and reproductive glands.

## Burrow

A hole or tunnel dug in the ground by an animal.

## Camouflage

Coloring that makes it easy to blend into nearby areas

## Cephalothorax

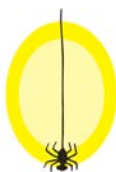

A section of the spider's body that contains the legs, eyes, and mouthparts.

## Cobweb

Old tangled spiderweb that has collected dust and dirt.

## Dragline

Long silk threads that trail behind the spider.

## Egg Sac

Sac made of silk that holds and protects the spider eggs.

## Habitat

Area where an animal normally lives.

## Molting

When the spider sheds its skin.

## Orb web

Circular web spun by a spider.

## Pedicel

The spider's waist, which connects the cephalothorax and the abdomen.

## Pedipalps or Palps

Two sensory feelers that look like very short legs.

## Prey

An animal hunted for food.

## Silk

A fine threadlike material spun by a spider

## Spiderlings

Baby spiders.

## Spinnerets

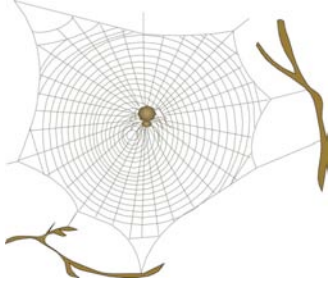

Where the spider's silk is made. On the hind end; there are usually six of them.

## Web

Pieces of silk put together by a spider.

# Your Own Vocabulary Book

Cut sheets of blank paper into fourths. (\*\*Math moment: If you put one picture each on the front and back of a fourth of a paper, how many pictures will fit on each sheet of paper? How many sheets of paper would you need to cut to for 24 pictures? What about 24 pages and a cover?)

On each page, paste or write one of the vocabulary words. Then draw or find pictures to illustrate each word. For lower grades, some of the pictures are provided.
